

## RoHS II statement

RoHS II is a EU directive (2011/65/EU) which restricts the use of certain heavy metals, brominated flame retardants and (from 2019) phthalic softeners in electrical and electronic equipment (EEE).

We do not supply electrical or electronic equipment (EEE) as such, RoHS does therefore not apply to our products. Our products do furthermore not contain polyvinyl chloride (PVC).

However, because some of our products may be used in electrical or electronic equipment by our clients we do everything within our power to comply with the RoHS II restrictions.

Our products do, according to our current data and information we have collected from our suppliers, not contain substances restricted in RoHS II above their threshold.

The above information is provided in good faith and is based on data considered accurate at the time of preparing this note. No warranty is expressed or implied regarding the completeness or accuracy of this data. As a manufacturer of non EEE parts, we depend on the information we receive from our suppliers. We cannot be held liable for damages or costs resulting from the use of or reliance on such information.
